

```
#include<iostream>
using namespace std;

int main()
{
    char character;

    cout<<"Enter the alphabet : ";
    cin>>character;

    if(character=='a' || character=='e' || character=='i' || character=='o' || character=='u')
    {
        cout<<"It's a vowel"<<endl;
    }

    else if(character=='A' || character=='E' || character=='I' || character=='O' || character=='U')
    {
        cout<<"It's a vowel"<<endl;
    }
    else
    {
        cout<<"It's a consonant"<<endl;
    }

    return 0 ;
}
```
