```cpp
#include<iostream>
using namespace std;

int main()
{
    float length,cm,m,km;

    cout<<"Converting length in meter and kilometer"<<endl;

    cout<<"Enter the length in centimeter : ";
    cin>>length;

    m=(length/100);
    cout<<"The length in meter : "<<m<<endl;

    km=(length/100000);
    cout<<"The length in kilometer : "<<km<<endl;

    return 0 ;

}
```
